

## PRINT FULFILLMENT WITH ECONOMICAL DELIVERY QUANTITIES

### ABSTRACT OF THE DISCLOSURE

5           Various systems, methods, and programs embodied in computer  
readable mediums are provided for print fulfillment. In one embodiment, a  
method is provided that comprises the step of maintaining a print quantity in a  
server. The print quantity maintained is associated with a recipient of printed  
images. The method also includes the step of accumulating a collection of  
10 images received from an originator in the server, where the collection of images  
is associated with the recipient. Also, the method further comprises the step of  
implementing a printing of the images included in the collection of images when  
a total number of the images included in the collection of images breaches the  
print quantity.
